About me

Software Engineer passionate about developing efficient and high-performance systems, specialized in building creative and scalable solutions with proven experience in collaborative work and continuous improvement. Recognized for problem-solving skills, ability to thrive in agile teams, and managing software projects from concept to delivery. Seeking to contribute to impactful software solutions that drive tangible business results. As a complement to my technical profile, I have also engaged in scientific and technological outreach activities.

Experience

Web Developer

Quito, Ecuador

Chasquis Compu Store

January 2023 – Present

- Designed and developed a service management system, automating manual registration processes and reducing processing times.
- Built responsive user interfaces with React and Bootstrap, improving user experience and decreasing interaction errors.
- Implemented automated testing with Selenium, increasing QA coverage and ensuring system stability in production environments.

Research Engineer / UX Researcher

Quito, Ecuador

LudoLab – Information Systems and Digital Inclusion Laboratory

October 2023 – Present

- Designed and developed interactive and accessible solutions, including educational serious games and a tele-rehabilitation platform, enhancing learning and rehabilitation experiences for diverse user groups.
- Conducted usability evaluations and user testing, recommending improvements that increased accessibility and optimized overall user experience.
- 18 co-authored scientific articles (Q1–Q3), disseminating research on interactive games and inclusive technologies.

Education

Bachelor of Software Engineering

June 2023

Escuela Politécnica Nacional

Quito, Ecuador

Graduated as Best Student of the class, with active participation in CEDIA research projects and co-authorship of scientific articles on educational and inclusive technologies.

Leadership & Activities

Escuela Politécnica Nacional

Quito, Ecuador

Logistics and Social Media Coordinator

October 2023 – Presente

- Led a multidisciplinary team in the planning and digital outreach of the “Digital Inclusion” and “Future Programmers” projects, increasing participation from technology-learning communities.
- Developed and optimized administrative and technological processes, improving operational efficiency.
- Established strategic partnerships with high-impact organizations, enhancing the visibility and sustainability of the programs.
